PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience developing full stack web applications using **2026**

- Made 10+ GitHub contributions across projects and repositories.

- Built Chrome Extension integrating AI assistant into Gmail; implemented tone-based generation.

EDUCATION

- Machine Learning Specialization -- Coursera

Alva's Institute of Engineering and Technology

B.E. Computer Science and Engineering -- CGPA: 8.6 | Moodbidri, Karnataka

Kittel Science College

PUC -- 88.83% | Dharwad, Karnataka

2026

Government High School, Lokur

SSLC -- 91.04% | Dharwad, Karnataka

- Participated in a National Level Hackathon and developed a full-stack web application.

- Designed REST APIs with React frontend, dashboard visualization, and MySQL database workflows.

TECHNICAL SKILLS

Programming:

AI & ML:

Frontend:

Backend:

Database:

Tools & Platforms:

Other: - AI Fundamentals -- Coursera - Solved 30+ HackerRank problems in Algorithms and SQL.

PROJECTS

AI-Based Continuous Indian Sign Language Recognition Using NLP Framework

- Real-time continuous Indian Sign Language recognition using MediaPipe Holistic and Bi-LSTM with Attention.

MindMail -- AI Email Assistant Platform | React, Java, Spring Boot, Gemini API

- Full-stack AI email platform for intelligent reply generation, summarization, and action-item extraction.

- Earned 50 Days Coding Badge on LeetCode through consistent problem-solving practice.

Smart Resource Allocation and Volunteer Management System | React, Java, SpringBoot, MySQL

- Full-stack platform for managing volunteers, surveys, and community resource allocation.

CERTIFICATIONS

- Java Full Stack Developer Specialization -- Coursera

ACHIEVEMENTS & ACTIVITIES

- Solved 130+ LeetCode problems across Arrays, Strings, Binary Search, and Stacks.
