PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience developing **full stack web applications** using **React.js, JavaScript, Python, Java, Spring Boot, Node.js, Express.js** and **MySQL**. Skilled in building **RESTful APIs**, backend applications, database-driven systems, authentication and API integration. Strong foundation in **Object-Oriented Programming, Data Structures and Algorithms, Artificial Intelligence, Machine Learning, NLP, SQL** and **Git/GitHub**. Strong problem-solving and analytical skills with a willingness to learn and adapt to new technologies.

EDUCATION

Alva's Institute of Engineering and Technology
B.E. Computer Science and Engineering — CGPA: 8.6
Kittel Science College
PUC — 88.83%
Government High School, Lokur
SSLC — 91.04%

2023 – Present
Moodbidri, Karnataka
2021 – 2023
Dharwad, Karnataka
2021
Dharwad, Karnataka

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, SQL
AI & Machine Learning: Artificial Intelligence, Machine Learning Fundamentals, NLP, Generative AI & LLM Fundamentals
Frontend: React.js, HTML5, CSS3
Backend: Python Flask, Spring Boot, REST APIs, JDBC, JPA, Hibernate, Authentication, CRUD Operations
Database: MySQL, Database Fundamentals
Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Maven
Other: API Integration, Problem Solving, Data Structures & Algorithms

PROJECTS

- AI-Based Continuous Indian Sign Language Recognition Using NLP Framework** *Ongoing*
- Developing a real-time continuous Indian Sign Language recognition system using MediaPipe Holistic and Bidirectional LSTM with Attention for sign-to-text conversion.
 - Integrating T5-based NLP for sentence generation, multilingual translation, and text-to-speech.
 - Building an offline, CPU-based web application supporting English, Kannada, Hindi, Tamil, and Telugu.
- MindMail – AI Email Assistant Platform** — *React, Java, Spring Boot, Gemini API* 2026
- Developed a full-stack AI email platform for intelligent reply **generation, summarization, smart replies**, and **action-item extraction**.
 - Built a **Chrome Extension** integrating the AI assistant directly into Gmail for seamless email reply generation.
 - Implemented **tone-based** email generation.
 - Integrated React frontend with Spring Boot REST APIs and **Gemini API** for responsive AI-powered email processing.
- Smart Resource Allocation and Volunteer Management System** | *React, java, SpringBoot, MySQL* 2026
- Developed a full-stack platform for managing volunteers, surveys and community resource allocation.
 - Designed REST APIs and integrated them with React-based frontend components.
 - Built dashboards to visualize community requirements and volunteer availability.
 - Implemented CRUD-based workflows and database integration using MySQL.

CERTIFICATIONS

- Java Full Stack Developer Specialization – Coursera
- AI Fundamentals – Coursera
- Theory of Computation – NPTEL, IIT Kharagpur

ACHIEVEMENTS AND ACTIVITIES

- Solved **130+** **LeetCode** problems across Arrays, Strings, Binary Search and Stacks.
- Earned **50 Days Coding Badge** on LeetCode through consistent problem-solving practice.
- Solved **30+** **HackerRank** problems in Algorithms and SQL.
- Participated in a **National Level Hackathon** and developed a full-stack web application.
- Made **10+** **GitHub** contributions across projects and repositories.
